

JATIN KAPOOR

Aspiring DevOps Engineer

Phone: +91-9599741970 | Email: Jatink9599@gmail.com

LinkedIn: linkedin.com/in/jatin-kapoor1 | Portfolio: jatinkapoor009.github.io

PROFESSIONAL SUMMARY

Aspiring DevOps Engineer with hands-on experience in AWS, Linux, Git, Jenkins, Docker and Terraform through academic and personal projects. Skilled in CI/CD automation, cloud infrastructure, containerization and DevSecOps practices. Passionate about building reliable deployment pipelines and continuously learning modern DevOps technologies.

TECHNICAL SKILLS

Cloud Platform: Amazon Web Services (AWS) — EC2, S3, IAM, VPC, ELB, CloudWatch, Security Group, SSL/TLS

CI/CD and Automation: Jenkins, GitHub Webhooks, Pipeline Automation, Continuous Integration, Continuous Delivery

Containerization: Docker (Build, Tag, Push, Run, Compose), Container Security, Image Scanning

Infrastructure as Code: Terraform (Modules, State Management, Remote Backend, Workspaces)

Scripting and Version Control: Bash Scripting, Shell Scripting, Git, GitHub, Version Control

Security and Code Quality: Trivy, SonarQube, DevSecOps, Vulnerability Scanning, Security Automation

Monitoring and Observability: AWS CloudWatch (Alarms, Dashboards, Logs, Metrics), Incident Response

OS and Networking: Linux Ubuntu (Linux Administration, Process Management), (TCP/IP, DNS, HTTP/HTTPS, SSH)

WORK EXPERIENCE

DevOps Intern — CloudDevOpsHub

- Spearheaded design and delivery of 3 production Jenkins CI/CD pipelines, automating build, test, security scanning, and deployment workflows, reducing manual effort by 70%.
- Provisioned and managed AWS EC2 instances with IAM roles, VPC networking, and security groups, supporting deployment of 2 production-grade applications with zero downtime.
- Containerized applications using Docker and integrated Trivy for image vulnerability scanning, reducing security incidents and cutting environment setup time by 50%.
- Authored Bash and Shell automation scripts; configured AWS CloudWatch dashboards and alarms, maintaining 99% uptime and enabling real-time incident response.

PROJECTS

AutoDeployX – CI/CD Pipeline using Jenkins, Docker & AWS

github.com/jatinkapoor009/autodeployx_static

Jenkins | GitHub | Docker | AWS EC2 | Trivy | CloudWatch

- Architected an end-to-end CI/CD pipeline using Jenkins and GitHub, automating build, vulnerability scan, and deployment across 2 environments, cutting release time by 60%.
- Integrated Trivy container image scanning at every commit stage, detecting and remediating critical vulnerabilities before production deployment.
- Configured GitHub webhooks for automated EC2 deployments, eliminating all manual release steps and improving deployment consistency and speed.

Cloud Infrastructure Automation – Terraform and AWS

Terraform | AWS EC2 | IAM | VPC | ELB | CloudWatch | Shell Scripting

- Engineered complete AWS infrastructure (EC2, IAM, VPC, ELB) using Terraform IAC, reducing cloud provisioning time from 2 hours to under 10 minutes.
- Developed Shell scripts for automated resource health checks; deployed CloudWatch alarms across 5 infrastructure components for proactive monitoring.
- Designed reusable Terraform modules ensuring 100% reproducible environments across development, staging, and production.

EDUCATION

Bachelor of Computer Applications — | MD University, Rohtak | July 2022 – August 2025 |

CERTIFICATIONS

Cloud and DevOps Hands-on Training — CloudDevOpsHub
