

JATIN KAPOOR

DevOps Engineer

Phone: +91-9599741970 | Email: Jatink9599@gmail.com | LinkedIn: linkedin.com/in/jatin-kapoor1

PROFESSIONAL SUMMARY

Results-oriented DevOps Engineer with expertise in designing automated CI/CD pipelines, provisioning scalable cloud infrastructure on AWS, and securing containerized application deployments using Docker and Trivy. Proficient in Jenkins, Terraform, Bash scripting, SonarQube, and AWS CloudWatch monitoring. Demonstrated ability to accelerate release cycles by 60%, eliminate manual deployment bottlenecks, and maintain 99% service uptime. Effective collaborator with strong troubleshooting skills and a commitment to DevSecOps best practices and continuous improvement.

TECHNICAL SKILLS

Cloud Platform: Amazon Web Services (AWS) — EC2, S3, IAM, VPC, ELB, CloudWatch, Security Group, SSL/TLS
CI/CD and Automation: Jenkins, GitHub Webhooks, Pipeline Automation, Continuous Integration, Continuous Delivery
Containerization: Docker (Build, Tag, Push, Run, Compose), Container Security, Image Scanning
Infrastructure as Code: Terraform (Modules, State Management, Remote Backend, Workspaces)
Scripting and Version Control: Bash Scripting, Shell Scripting, Git, GitHub, Version Control
Security and Code Quality: Trivy, SonarQube, DevSecOps, Vulnerability Scanning, Security Automation
Monitoring and Observability: AWS CloudWatch (Alarms, Dashboards, Logs, Metrics), Incident Response
OS and Networking: Linux Ubuntu (Linux Administration, Process Management), (TCP/IP, DNS, HTTP/HTTPS, SSH)

WORK EXPERIENCE

DevOps Engineer — CloudDevOpsHub2025

- Spearheaded design and delivery of 3 production Jenkins CI/CD pipelines, automating build, test, security scanning, and deployment workflows, reducing manual effort by 70%.
- Provisioned and managed AWS EC2 instances with IAM roles, VPC networking, and security groups, supporting deployment of 2 production-grade applications with zero downtime.
- Containerized applications using Docker and integrated Trivy for image vulnerability scanning, reducing security incidents and cutting environment setup time by 50%.
- Authored Bash and Shell automation scripts; configured AWS CloudWatch dashboards and alarms, maintaining 99% uptime and enabling real-time incident response.

PROJECTS

AutoDeployX – Automated DevSecOps CI/CD Pipeline github.com/jatinkapoor009/autodeployx_static

Jenkins | GitHub | Docker | AWS EC2 | Trivy | Bash Scripting | CloudWatch

- Architected an end-to-end CI/CD pipeline using Jenkins and GitHub, automating build, vulnerability scan, and deployment across 3 environments, cutting release time by 60%.
- Integrated Trivy container image scanning at every commit stage, detecting and remediating critical vulnerabilities before production deployment.
- Configured GitHub webhooks for automated EC2 deployments, eliminating all manual release steps and improving deployment consistency and speed.

Cloud Infrastructure Automation – Terraform and AWS

Terraform | AWS EC2 | IAM | VPC | ELB | CloudWatch | Shell Scripting

- Engineered complete AWS infrastructure (EC2, IAM, VPC, ELB) using Terraform IAC, reducing cloud provisioning time from 2 hours to under 10 minutes.
- Developed Shell scripts for automated resource health checks; deployed CloudWatch alarms across 5 infrastructure components for proactive monitoring.
- Designed reusable Terraform modules ensuring 100% reproducible environments across development, staging, and production.

EDUCATION

Bachelor of Computer Applications — | MD University, Rohtak | July 2022 – August 2025 |

CERTIFICATIONS

Cloud and DevOps Hands-on Training — CloudDevOpsHub
